

PayPal Setup

Last Modified on 08/15/2019 1:18 pm EDT

When it comes to ease of use and security, PayPal is a favorite among both businesses and consumers. On your SimplePart site, you have the ability to integrate either PayPal Standard, Pro, or Express as valid payment options.

If you do not currently have a PayPal account, you can sign up for one by [clicking here](#).

Tip: We recommend having a combination of PayPal and Payment Gateway (Credit Card) options to increase the payment opportunities for your online customers.

Once you have access to your PayPal account, some settings will need to be adjusted in order to work with the cart page on your website:

1. Log in at manager.paypal.com
2. Go to Service Settings > Set Up.
3. Transaction Process Mode should be Live. If it still reads Test and you are unable to make a change, please call PayPal.
4. Insert the Cancel URL, <http://cancel.this.order>.

PayPal | Manager

Home | Account Administration | **Service Settings** | Search Transactions | Virtual Terminal | Reports |

Hosted Checkout Pages |

Set Up | Customize | Integrate |

Set Up

Choose your settings

Here are your current Hosted Checkout Page settings. You can change them on this page to modify the checkout page.

Transaction Process Mode: **Live** ▼

Display options on payment page

Here is how your current Hosted Checkout Page will look.

Enter Text for Cancel URL: (optional)

Enter Cancel URL:

Enter Error URL: [What is this?](#)

Cancel URL Method: **GET** ▼

Enter Button Text: [What is this?](#)

PayPal Express Checkout

Add [PayPal Express Checkout](#) and [PayPal Credit](#) to your hosted checkout pages.

Enable PayPal Credit: **Yes** ▼

How Your Pages Look: **Design Pages**

PayPal email address: [What is this?](#)

PayPal Sandbox email address: [What is this?](#)

Billing Information

5. Scroll to the bottom and make sure your Security Settings match the ones shown in the image, then click “Save Changes.”

(optional)

Email copy to merchant address:

(optional)

Enter your header text:

(optional)

Enter your footer text:

(optional)

Security Options

Use these settings to allow or decline transactions based on AVS/CSC responses. If PayPal is your payment processor, be sure the AVS and CSC settings match the AVS and CSC responses. For details, see [Help](#).

AVS: **Full** ▼

CSC: **Full** ▼

Enable Secure Token: **Yes** ▼ [What is this?](#)

Save Changes 

Once this is completed, the next step is to customize the layout. This is also located in “Service Settings” under “Customize.”

Select “Layout C,” then click “Save and Publish.”

Fraud Filters:

We also highly recommend adjusting your security filters to help prevent fraudulent orders from coming through on your site. Keep in mind this is only a preventative measure and does not fully guarantee all fraudulent attempts will be identified.

1. In your Payflow Manager account, click Home near the top of the page.
2. Under "Service Summary", choose "Basic" or "Advanced Fraud Protection."
3. Click "Test Setup" near the center of the page.
4. Click Edit Standard Filters.
5. Toggle settings, if applicable.
6. Click Test Setup Link.
7. Under "Deploy Test Setup Filters to Live Setup," click "Move Test Filter" Settings to Live.
8. To confirm, click "Move Test Filter Settings" to "Live" near the bottom of the page.

If you have any issues accessing manager.paypal.com or have any questions, please reach out to SimplePart Support at 404-520-7640.
