

How to Change OMNIPARTS Pricing

Last Modified on 09/20/2023 10:44 am EDT

OMNIPARTS Automotive Parts Online allows the Nissan customer to shop for all of the vehicles in their garage. These parts are designed to fit vehicles across a wide spectrum of makes and models, so implementing a competitive pricing strategy with OMNIPARTS can have a fantastic payoff: consumers who purchase these parts benefit not only from Nissan-backed quality that they trust, but from savings as well.

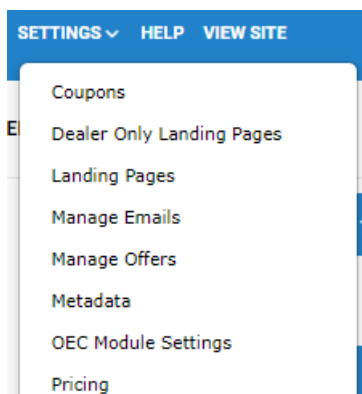

If you'd like to change pricing on Omniparts, you can do so through the SimplePart Control Panel. The process is simple:

- Log in through NNA net
- Go to the SimplePart Control Panel
- Choose your dealer url at the top right dropdown menu

The screenshot shows the top navigation bar of the SimplePart Control Panel. On the left, there is a dropdown menu currently displaying 'parts.nissanusa.com'. To its right is a 'Log Out' button with a circular arrow icon. Below these, there are two search input fields: one labeled 'number' and another labeled 'Customer Search', each followed by a blue 'GO' button.

- Go to the Settings menu and choose Pricing from the dropdown list

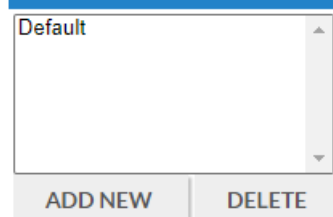

The screenshot shows a dropdown menu open from the 'SETTINGS' link in the top navigation bar. The menu contains several options: 'Coupons', 'Dealer Only Landing Pages', 'Landing Pages', 'Manage Emails', 'Manage Offers', 'Metadata', 'OEC Module Settings', and 'Pricing'. The 'Pricing' option is highlighted with a blue background.

- Click the “ADD NEW” button and to set new pricing sets
